

Scored Respondent Profiles

POC Eval Harness — Groups A / B / C (serialized from spec v1.2-frozen)

Profiles in this document: A1, A2, B1, B2, B3, B4, C1, C2

A1 — Harbor Point Rentals

Group A | tuning_only: False

Summary

SCORED profile A1 — Group A clean happy path. Self-owner, direct-booking channel → S5 surfaces. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group A / A1. No facts invented.

Facts

Field	Value
business_name	Harbor Point Rentals
location	Sarasota, FL
listing_count	5
channels	["airbnb", "vrbo", "direct"]
ownership_model	all_self_owned
revenue_recognition	checkin_date
non_refundable_enabled	False
security_deposit_type	damage_waiver
security_deposit_amount	50
payment_timing	at_booking
mandatory_fees	[]
taxes	[{"tax_type": "sales_tax", "rate": 6, "scope": "account_wide", "jurisdiction": "Florida"}, {"tax_type": "tourist_tax", "rate": 2, "scope": "account_wide", "jurisdiction": "Sarasota County"}]
teammates	[]
focus_topics	["pricing_strategy", "guest_messaging"]
pain	Manual pricing takes too much time. I'm adjusting rates by hand every morning.
website	{"brand_name": "Harbor Point Stays", "domain": "guesty_subdomain", "terms": "guesty_terms"}

Persona

Cooperative, organized, answers every question directly and in full. Uses standard industry vocabulary (not Airbnb-specific jargon). Does not seek advice. Provides numbers without being asked twice. When the agent echoes back, confirms immediately. Does not volunteer off-topic information. Response style: short, professional sentences.

Answer Key

Slot	Expected
listing_count	recorded:5
channels	recorded:["airbnb","vrbo","direct"]
revenue_recognition	recorded:checkin_date [provisional G3]
non_refundable_enabled	recorded:false
security_deposit_type	recorded:damage_waiver

security_deposit_amount	recorded:50
payment_timing	recorded:at_booking
payment_split	skipped
mandatory_fees	skipped
taxes	flagged
website_brand_name	recorded:Harbor Point Stays
website_domain	recorded:guesty_subdomain
website_terms	recorded:guesty_terms
decision_owner	recorded:just_me
teammates	skipped
focus_topics	recorded:["pricing_strategy","guest_messaging"]
pain	recorded:Manual pricing takes too much time. Adjusting rates by hand every morning.
ownership_model	recorded:all_self_owned
owners	skipped
rate_strategy	recorded:dynamic

Scoring Note

S5 surfaces (direct channel present). owners skipped (no managed properties). taxes always flagged (human handoff). decision_owner derived just_me from 'solo operator'. S0a (business_name/location) and S3 placeholder slots (checkin_method/cleaning_managed_by) not scored. ownership_model normalized to canonical schema enum 'all_self_owned' (spec v1.3). mandatory_fees skipped: the \$85 cleaning fee is per-property (configured per listing), not an account-level mandatory fee — agent correctly routes it per S4 NOTE in system prompt.

A2 — Coastal Keys Management

Group A | tuning_only: False

Summary

SCORED profile A2 — Group A clean happy path. Simple managed, two flat-fee owners, split payment, no direct channel (S5 not surfaced). Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group A / A2.

Facts

Field	Value
business_name	Coastal Keys Management
location	Key West, FL
listing_count	8
listing_breakdown	5 self-owned + 3 managed
channels	["airbnb", "booking"]
ownership_model	mixed
owners	[{"owner_name": "Maria Chen", "email": "maria@chen-properties.com", "listings": 2, "management_model": "flat_fee", "fixed_fee_amount": 200, "fee_per": "per_listing_per_month", "who_pays_channel_commission": "owner"}, {"owner_name": "Tom Walsh", "email": "tomw@walsh.net", "listings": 1, "management_model": "flat_fee", "fixed_fee_amount": 150, "fee_per": "per_listing_per_month", "who_pays_channel_commission": "owner"}]
revenue_recognition	checkout_date
non_refundable_enabled	True
security_deposit_type	damage_protection
payment_timing	split
payment_split	{"first_pct": 50, "second_pct": 50, "second_trigger": "7_days_before"}
mandatory_fees	[]
taxes	[{"tax_type": "sales_tax", "rate": 6, "jurisdiction": "Florida"}, {"tax_type": "tourist_tax", "rate": 4, "jurisdiction": "Monroe County"}]
teammates	[{"name": "Alex Rivera", "email": "alex@coastalkeys.com", "role": "viewer", "listing_scope": "all"}]
focus_topics	["owner_reporting", "channel_mix"]
pain	Keeping owners happy with transparent reports.

Persona

Organized and professional. Has managed properties before and knows the vocabulary ('management fee,' 'flat fee,' 'owner statement'). Provides owner details in one go when asked (doesn't need follow-up per owner). Confirms echo-backs promptly. No advice-seeking. Does not mention a website → S5 should not surface.

Answer Key

Slot	Expected
listing_count	recorded:8
channels	recorded:["airbnb","booking"]

revenue_recognition	recorded:checkout_date [provisional G3]
non_refundable_enabled	recorded:true
security_deposit_type	recorded:damage_protection
security_deposit_amount	skipped
payment_timing	recorded:split
payment_split	recorded:50/50 — second 50% due 7 days before arrival
mandatory_fees	skipped
taxes	flagged
website_brand_name	conditional:surface_if_direct_signals
decision_owner	recorded:shared
teammates	recorded:1 teammate — Alex Rivera, viewer, all listings
focus_topics	recorded:["owner_reporting","channel_mix"]
pain	recorded:Keeping owners happy with transparent reports.
ownership_model	recorded:mixed
owners	recorded:2_owners

Scoring Note

S5 NOT surfaced (no direct channel). owners aggregate recorded:2_owners; per-owner economics (flat_fee \$200/\$150) are recorded + flag_for_call_1 in spec. decision_owner derived shared from presence of teammate (VA). channels normalized to canonical schema enum 'booking' (spec v1.3).

B1 — Summit Stay Co

Group B | tuning_only: False

Summary

SCORED profile B1 — Group B ambiguity. Channel-dependent payment timing; direct channel → S5 surfaces. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group B / B1.

Facts

Field	Value
business_name	Summit Stay Co
location	Breckenridge, CO
listing_count	12
channels	["airbnb", "vrbo", "direct"]
ownership_model	all_self_owned
revenue_recognition	checkin
non_refundable_enabled	True
non_refundable_note	Yes on select listings (mountain season)
security_deposit_type	damage_waiver
security_deposit_amount	75
payment_timing_direct	50% at booking, 50% two weeks before arrival
payment_timing_ota	Collected by OTA at booking (not managed in Guesty)
mandatory_fees	[{"fee_type": "hot_tub", "amount": 40, "per": "stay", "applies_to": "select_listings"}]
taxes	[{"tax_type": "sales_tax", "rate": 2.9, "jurisdiction": "Colorado"}, {"tax_type": "lodging_tax", "rate": 2, "jurisdiction": "Summit County"}, {"tax_type": "city_tax", "rate": 2.5, "jurisdiction": "Breckenridge"}]
focus_topics	["pricing_strategy", "accounting_setup"]
pain	Reconciling what Airbnb and VRBO pay me with what's actually in the system. It's a mess.

Persona

Detailed and thorough; volunteers channel-level breakdowns without being asked. When agent asks about payment timing, respondent answers: 'Depends on the channel — Airbnb and VRBO collect at booking, but for direct bookings I take half upfront and the other half two weeks out.' Does not simplify unless agent pushes. Does not seek advice. Mentions direct bookings unprompted when discussing channels.

Answer Key

Slot	Expected
channels	recorded:["airbnb","vrbo","direct"]
payment_timing	recorded:channel-dependent — OTA collected_by_channel; direct split
payment_split	recorded:50/50 — second 50% due 14 days before arrival (direct channel only)
mandatory_fees	recorded:hot_tub 40 per stay (select listings)
taxes	flagged

website_brand_name	conditional:surface_if_direct_signals
ownership_model	recorded:all_self_owned

Scoring Note

S5 SURFACES (direct bookings confirmed) — represented as the conditional default; surfacing is intentional per spec.
KEY EVAL CRITERION: agent must ask exactly ONE clarifying question for payment timing and record the channel-conditional structure, not a single enum. ownership_model normalized to canonical schema enum 'all_self_owned' (spec v1.3). Spec answer key is partial (hero/ambiguity slots only); facts carry full ground truth.

B2 — Blue Ridge Partners

Group B | tuning_only: False

Summary

SCORED profile B2 — Group B ambiguity. Three owners with vague/heterogeneous commission language; no direct channel. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group B / B2.

Facts

Field	Value
business_name	Blue Ridge Partners
location	Asheville, NC
listing_count	10
ownership_model	all_managed_for_others
owners	[{"owner_name": "Pat Okafor", "email": "pat@okafor.com", "listings": 4, "management_model": "commission", "pmc_commission_rate": "~18", "note": "negotiated, not a fixed rate"}, {"owner_name": "Diane Novak", "email": "dnovak@gmail.com", "listings": 4, "management_model": "flat_fee", "fixed_fee_amount": "~180", "note": "around \$180 each, I think"}, {"owner_name": "Chris Lim", "email": "clim@limgroup.biz", "listings": 2, "management_model": "revenue_split", "split_terms": "Owner receives 75% of revenue after OTA/channel fees are deducted", "note": "verbal agreement; 75% extracted via follow-up"}]
who_pays_channel_commission	owner
revenue_recognition	checkout
non_refundable_enabled	False
security_deposit_type	none
payment_timing	at_booking
mandatory_fees	[]
taxes	[{"tax_type": "sales_tax", "rate": 4.75, "jurisdiction": "North Carolina"}, {"tax_type": "occupancy_tax", "rate": 6, "jurisdiction": "Buncombe County"}]
focus_topics	["owner_reporting", "accounting_setup"]
pain	Explaining to owners why their payouts are different every month.

Persona

Conversational and warm. Gives approximate figures ('around,' 'I think,' 'about'). When pushed for exact numbers, admits some uncertainty and provides ranges or says 'let me check my contract.' For Owner 3 (Chris Lim), is genuinely vague: 'We have a verbal agreement — he gets 75% of whatever comes in after the OTA takes their cut.' Does not volunteer information proactively; the agent must ask for each owner in sequence.

Answer Key

Slot	Expected
ownership_model	recorded:all_managed_for_others
owners	recorded:3_owners
taxes	flagged

Scoring Note

S5 NOT surfaced (no direct channel). owners aggregate recorded:3_owners; per-owner: Pat ~18% commission, Diane ~\$180 flat, Chris 75% revenue_split — all recorded approximate + flag_for_call_1. KEY EVAL CRITERION: at most one clarifying question per owner; record approximates for Pat/Diane; for Chris, extract the specific 75% via one follow-up (not 'most of it'). ownership_model normalized to canonical schema enum 'all_managed_for_others' (spec v1.3). Spec answer key is partial (hero slots only); facts carry full ground truth.

B3 — Coastal Keys Management

Group B | tuning_only: False

Summary

SCORED profile B3 — Group B vocabulary mismatch (NLU normalization). Same underlying business as A2 (Coastal Keys Management) told entirely in layperson Airbnb vocabulary. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group B / B3.

Facts

Field	Value
business_name	Coastal Keys Management
channels	["airbnb", "booking"]
channels_user_words	I'm on Airbnb and Booking
mandatory_fees	[{"fee_type": "cleaning_fee", "amount": 85}]
mandatory_fees_user_words	cleaning fee of \$85
revenue_recognition	checkout_date
revenue_recognition_user_words	I get paid when they leave
payment_timing	at_booking
payment_timing_user_words	they pay up front when they book
taxes	[{"tax_type": "sales_tax", "rate": 6, "jurisdiction": "state"}]
taxes_user_words	the state takes 6%
non_refundable_enabled	False
non_refundable_user_words	I don't do the non-refundable thing
security_deposit_type	damage_protection
security_deposit_user_words	I use that damage coverage thing from Airbnb
ownership_model	mixed
owners	[{"owner_name": "Maria Chen", "email": "maria@chen-properties.com", "listings": 2, "management_model": "flat_fee", "fixed_fee_amount": 200}, {"owner_name": "Tom Walsh", "email": "tomw@walsh.net", "listings": 1, "management_model": "flat_fee", "fixed_fee_amount": 150}]
focus_topics	["owner_reporting"]
focus_topics_user_words	keeping owners in the loop / making sure my owners see their statements
pain	My owners always ask me for their money breakdown and I do it by hand

Persona

Friendly, casual, uses Airbnb-ecosystem vocabulary throughout. Says 'portals' not 'channels.' Says 'cleaning fee' not 'additional fee.' Says 'they pay when they book' not 'at_booking.' Says 'statements' for owner payouts. Says 'that damage coverage' for damage_protection. If the agent uses Guesty jargon without explanation, asks 'what does that mean?' — agent must rephrase, not repeat the jargon.

Answer Key

Slot	Expected
------	----------

channels	recorded:["airbnb","booking"]
mandatory_fees	recorded:cleaning_fee 85
revenue_recognition	recorded:checkout_date
payment_timing	recorded:at_booking
taxes	flagged
non_refundable_enabled	recorded:false
security_deposit_type	recorded:damage_protection
focus_topics	recorded:["owner_reporting"]
pain	recorded:My owners always ask me for their money breakdown and I do it by hand
ownership_model	recorded:mixed
owners	recorded:2_owners

Scoring Note

S5 NOT surfaced (no direct channel). TEST IS NLU, NOT VALUES: agent must map non-canonical vocabulary to the same slot values as A2 despite layperson phrasing, and rephrase jargon when asked. ownership_model recorded:mixed carried from A2 (Appendix C: 'mixed/managed'); owner facts carried from A2 ('same underlying business as A2'). Spec answer key derived from the B3 business-reality↔user-words mapping table.

B4 — Olive Tree Rentals

Group B | tuning_only: False

Summary

SCORED profile B4 — Group B robustness. Respondent defers the entire Financials (S4) section; agent must accept the skip gracefully without retry loops. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group B / B4.

Facts

Field	Value
business_name	Olive Tree Rentals
location	Santa Fe, NM
listing_count	6
listing_note	self-owned adobe-style properties
channels	["airbnb", "vrbo"]
ownership_model	all_self_owned
focus_topics	["guest_messaging", "channel_mix"]
pain	Responding to inquiries across two platforms is exhausting.
financial_preference	Defers ALL S4 questions to onboarding call

Persona

Warm, a little scattered, visibly uncomfortable when money topics come up. On the first S4 question: 'Can we skip the money stuff for now? I'd rather go through that with someone on your team.' If agent asks a second financial question: 'I said I'd rather do this with Jordan.' If agent asks a third: silence or 'I thought we moved on?' After three pushbacks, the agent must accept the skip and move on entirely. No partial answers on any S4 field.

Answer Key

Slot	Expected
revenue_recognition	skipped
non_refundable_enabled	skipped
security_deposit_type	skipped
security_deposit_amount	skipped
payment_timing	skipped
payment_split	skipped
mandatory_fees	skipped
taxes	skipped
ownership_model	recorded:all_self_owned
focus_topics	recorded:["guest_messaging","channel_mix"]
pain	recorded:Responding to inquiries across two platforms is exhausting.

Scoring Note

S5 NOT surfaced (no direct channel). ALL S4 slots skipped (respondent deferred) — excluded from SAR denominator.
KEY EVAL CRITERION: agent accepts the skip after no more than two follow-up prompts; no S4 field partially filled;
does not circle back. ownership_model normalized to canonical schema enum 'all_self_owned' (spec v1.3).

C1 — Alpine Property Group

Group C | tuning_only: False

Summary

SCORED profile C1 — Group C complex portfolio. Four owners, four distinct management models, one legitimate deferral; direct channel → S5 surfaces. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group C / C1.

Facts

Field	Value
business_name	Alpine Property Group
location	Lake Tahoe, CA/NV
listing_count	12
listing_breakdown	1 self-owned + 11 managed
channels	["airbnb", "vrbo", "direct"]
ownership_model	mixed
owners	[{"owner_name": "Sarah Mitchell", "email": "sarah@mitchell-tahoe.com", "listings": 3, "management_model": "commission", "pmc_commission_rate": 20, "who_pays_channel_commission": "owner", "note": "20% commission of gross revenue; confirm gross-vs-net basis"}, {"owner_name": "James Park", "email": "james@parkventures.co", "listings": 2, "management_model": "flat_fee", "fixed_fee_amount": 500, "fee_per": "per_listing_per_month"}, {"owner_name": "Claudia Reyes", "email": "claudia@reyes-properties.com", "listings": 4, "management_model": "revenue_split", "split_terms": "Owner receives 70% of revenue after OTA/channel fees; PMC retains 30%", "who_pays_channel_commission": "owner"}, {"owner_name": "Marcus Webb", "email": "marcus@webbinv.net", "listings": 2, "management_model": "deferred", "note": "we have something in place but I'd rather work it out with your team"}]
self_owned_listings	1
revenue_recognition	checkin
non_refundable_enabled	True
non_refundable_scope	listings 1-3 (Sarah's properties) only
security_deposit_type	damage_waiver
security_deposit_amount	100
security_deposit_scope	all managed listings
payment_timing	Full at booking (OTA) or 50/50 for direct
taxes	[{"tax_type": "sales_tax", "rate": 9.25, "jurisdiction": "California"}, {"tax_type": "occupancy_tax", "rate": 10, "jurisdiction": "El Dorado/Placer County TOT"}]
teammates	[{"role": "cleaner", "count": 2, "listing_scope": "property-scoped", "access": "limited"}]
focus_topics	["owner_reporting", "pricing_strategy"]
pain	I have four different deal structures and I'm managing them in a Google spreadsheet.

Persona

Knowledgeable, speaks in property management terms. When the agent asks about owners, provides all four in a single pass: 'I have four owners — Sarah Mitchell handles three cabins on a 20% commission, James Park has two

units on a \$500 flat monthly per unit, Claudia Reyes has four and we do a 70/30 split where she keeps 70 after channel fees, and Marcus Webb has two but we're still working out his arrangement.' Cooperative for 3 out of 4 owners; deflects on Marcus (legitimate deferral). Confirms echo-backs line by line.

Answer Key

Slot	Expected
ownership_model	recorded:mixed
owners	recorded:4_owners
non_refundable_enabled	recorded:true
taxes	flagged
security_deposit_type	recorded:damage_waiver
security_deposit_amount	recorded:100
website_brand_name	conditional:surface_if_direct_signals

Scoring Note

S5 SURFACES (direct channel present) — represented as the conditional default. owners aggregate recorded:4_owners; per-owner: Sarah 20% commission, James \$500 flat, Claudia 70/30 split, Marcus deferred (management_model skipped) — clear three recorded + all flag_for_call_1. non_refundable_enabled recorded:true + flag_for_call_1 (Sarah's 3 listings only). security_deposit \$100 maps to security_deposit_type (damage_waiver), not mandatory_fees. KEY EVAL CRITERION: fan out to all four owners without conflation; accept Marcus's deferral; one coherent flag_for_call_1 summary. Spec C1 answer key is partial (hero/financials slots); teammates (2 cleaners) present in facts but absent from the scored answer key.

C2 — Lakeside Group

Group C | tuning_only: False

Summary

SCORED profile C2 — Group C complex portfolio. Large managed operation described colloquially; approximate counts; verbal revenue split; direct channel → S5 surfaces. Serialized verbatim from docs/planning-artifacts/poc-respondent-specs-2026-06-02.md (v1.2-frozen) §Group C / C2.

Facts

Field	Value
business_name	Lakeside Group
location	Lake Norman, NC
listing_count	20
listing_breakdown	8 self-owned + 12 managed for one family
channels	["airbnb", "vrbo", "direct"]
ownership_model	mixed
owners	[{"owner_name": "Grantham Family", "email": "estate@granthamholdings.com", "listings": 12, "management_model": "revenue_split", "split_terms": "Owner receives 70% of revenue after channel/platform fees are deducted", "who_pays_channel_commission": "owner", "note": "estate entity; 70% confirmed via follow-up"}]
revenue_recognition	checkout
non_refundable_enabled	False
security_deposit_type	advanced_deposit
security_deposit_amount	200
security_deposit_note	\$200 cash-equivalent refundable deposit — maps to trust-accounting Advanced Deposit, not Damage Protection
payment_timing	at_booking
mandatory_fees	[]
taxes	[{"tax_type": "sales_tax", "rate": 4.75, "jurisdiction": "North Carolina"}, {"tax_type": "occupancy_tax", "rate": 3, "jurisdiction": "Catawba County"}]
teammates	[{"role": "cleaner", "count": 3, "listing_scope": "property-scoped", "access": "limited"}, {"role": "admin", "count": 1, "listing_scope": "all", "access": "full"}]
focus_topics	["owner_reporting", "accounting_setup"]
pain	The family sends me emails asking where their money is. I need a proper statement.

Persona

Conversational, storytelling style. Does not use business terminology. Describes the owner as 'a family I've been working with for years' before providing the name. When asked listing count, says 'maybe 8 or so of mine, and the rest are theirs — about 12.' Agent must ask for exact counts (gets 8 and 12 confirmed). When asked about the revenue arrangement: 'I take my cut off the top after the platform fees — they end up with about 70% of what's left.' Does not use 'revenue split,' 'PMC commission,' or 'BusinessModel.' Mentions 'direct bookings' when listing channels.

Answer Key

Slot	Expected
listing_count	recorded:20
ownership_model	recorded:mixed
owners	recorded:1_owner
security_deposit_type	flagged
security_deposit_amount	recorded:200
payment_timing	recorded:at_booking
channels	recorded:["airbnb","vrbo","direct"]
website_brand_name	conditional:surface_if_direct_signals
taxes	flagged
decision_owner	recorded:shared
teammates	recorded:4 teammates — 3 cleaners (limited/property-scoped) + 1 admin (full/all)
focus_topics	recorded:["owner_reporting","accounting_setup"]
pain	recorded:Family sends emails asking where their money is. Need a proper statement.

Scoring Note

S5 SURFACES (direct channel present) — conditional default. listing_count recorded:20 only after a count-precision follow-up (8 + 12). owners aggregate recorded:1_owner (Grantham Family); management_model revenue_split semantically extracted from 'I take my cut after platform fees'; split_terms 70% via follow-up + flag_for_call_1. security_deposit_type flagged (confirm Advanced Deposit vehicle with Jordan), amount recorded:200. decision_owner derived shared from presence of teammates. KEY EVAL CRITERION: ask for exact count (not 'about 8'); map colloquial split to revenue_split + split_terms; echo before write + flag for Call 1.
